

**REMARKS**

Claims 1-20 and 22-37 are presently pending. No amendments to the claims have been made in this Supplemental Reply. The claims, as listed in the Amendment filed on August 12, 2004, reflect the last version of the claims.

**Comments on New Claims 33-37**

The Examiner states that Applicant has failed to provide arguments regarding the patentability of new Claims 33-37.

Independent Claim 33 includes providing an overlay that includes at least two oversized holes therein and providing at least two fasteners and inserting each fastener through each oversized hole in the overlay and attaching a washer to fastener to movably secure each fastener to the overlay. These limitations are similar to ones found in allowed Claim 1.

Claims 34-36 depend from Claim 33, which is believed to contain patentable subject matter.

Independent Claim 37 recites that each washer spaces the overlay from the main body when the overlay is attached to the main body in the first position and the second position. This limitation is similar to that found in allowable Claims 23 and 32.

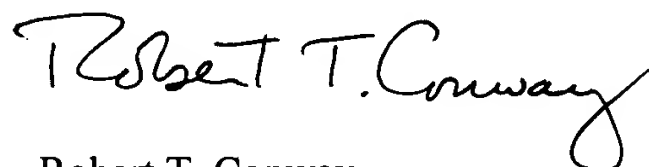

**CONCLUSION**

In view of the above amendments and remarks, it is believed that all claims are in condition for allowance, and it is respectfully requested that the application be passed to issue. If

the Examiner believes that a telephone conference would expedite prosecution of this case, the Examiner is invited to call the undersigned.

Respectfully submitted,

HAMILTON, BROOK, SMITH &  
REYNOLDS, P.C.
